I and my friends participated in English course in Byswater Cyprus in Limassol.

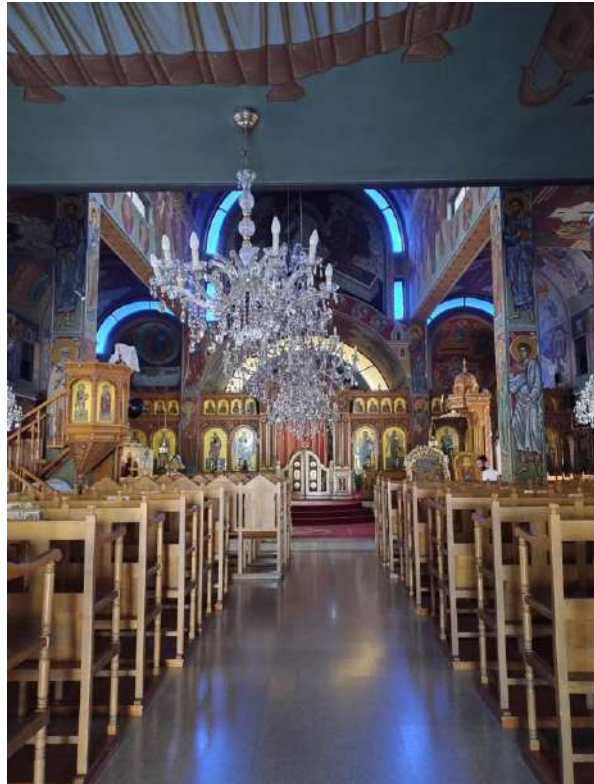

I had the opportunity to improve my reading, writing and speaking in English in an international group.

I met very polite people from all over Europe. It was interesting to speak with them and to find out what education is like in their schools.

Every day after the lessons our school organized activity for students. We had meetings in Conversation Club, we could participate in various types of trips, for example to Paphos, Nicosia, Ayia Napa or to typical villages with churches, fruits, food and olive oil.

I learned about Cypriot history, culture and cuisine. I could rest and relax on beautiful beaches.

I hope that I will have another chance to be a part of another European projects that allow me to develop as a teacher and a person.

Thank you for new experience!
