We attended a language school Bayswater in Limassol where we learned English under the supervision of qualified, international teachers.

After the school we had free time and we could get to know Cypriot culture, nature and cuisine. It was the time where we could use our English not only at school.

We met many teachers from all over Europe. We learned English but also we had time to speak about schools in our countries. We could exchange valuable tips and work experience.

Thank you for the opportunity to be part of this wonderful project!
